## HAMPERS BUSINESS.

Coffee Drinking Incapacitates Some People for Business at Times.

A gentleman from McBain, Mich., says: "Coffee drinking has cost me much, for during my life I have been many times so thoroughly put out of condition that I have been compelled to abandon business for a day or two at a time. The attacks of headache would commence on the right side behind the ear and become so severe as to totally incapacitate me for any exercise, even mental. I have frequently had to take morphine to relieve the suffering. Sour stomach troubled me and I had a nervous heart that gave me a great deal of trouble."

"Four years ago I saw an advertisement for Postum Food Coffee which recited the ill effects of coffee on the nerves. I at once decided to make the change and leave off coffee and take on Postum. The result has been all that one could expect. 'I am never completely any more, the bilious attacks never come on except from some indiscretion such as drinking coffee, which I am foolish enough to indulge in now and then. I have no more headaches, no more sour stomach and no more bilious spells. I have not been sick to my stomach or had a nervous vomiting spell in three years. Am now fifty-six years old, and have better health and do a better business and more comfortable than ever before in my life. I certainly attribute the change to leaving off coffee and using Postum, for I have taken no medicine to aid in making the change. 'The experiment as stated is absolutely true. I am willing, if necessary, to attach my name to it.' Name given by Postum Co., Battle Creek, Mich."

BY "MARMADUKE"

The New York World Almanac for 1902 contains a list of Americans who possess two hundred thousand pounds and upward. There are about four thousand five hundred names on the list, and it covers forty-six columns! In Great Britain there may be, at the most, a thousand whose capital reaches or exceeds the sum mentioned. This gives a life comparison of the wealth of the two countries, and should provide matter for thought to those who imagine that the Old World can compete with the New without adapting its methods of business to the altered circumstances of the times.
